Dear Friends and Colleagues,

Fertility Preservation is now widely accepted as ‘Standard of Care’ for patients at risk of reduced fertility resulting from cytotoxic drugs or genetic predisposition. Appropriate patient selection for Fertility Preservation, Management of Cancer, and Careful Follow-up within a multidisciplinary setting is critical. Dedicated Workshops and CME’s in Oncofertility allow us to improve our knowledge and technical expertise.

The Asian Society for Fertility Preservation (ASFP) is proud to announce its Second Annual Conference on ‘Fertility Preservation – Technique & Technology’ on the 22nd & 23rd of September 2018 in the capital city of New Delhi (India) with a Hands-on Workshop on the 20th September 2018. The Fertility Preservation Society of India is honoured to organize the event in association with its own 5th Annual Conference ‘FERTIPROTECT – 2018’.

This meeting will provide a platform for Oncologists, ART Specialists and Gynecologists to exchange information and treatment strategies. Your presence and participation will be our privilege as it will contribute to the success of the program.

President ASFP
Prof. Nao Suzuki

Secretary ASFP
Dr. Nalini Mahajan

Local Organizing Chairperson
Dr. Sabhyata Gupta (President FPSI)
